Film From Wikipedia, the (free) encyclopedia For other uses, see Film disambiguation movie and Moving picture redirect here. For other uses, see movie disambiguation and Moving picture disambiguation. A film, also called a movie, motion picture or moving picture, is a work of visual art used to simulate experiences that communicate ideas, stories, perceptions, feelings, beauty, or atmosphere through the use of moving images. These images are generally accompanied by sound, and more rarely, other sensory stimulations.<sup>1</sup> The word cinema, short for cinematography, is often used to refer to filmmaking and the film industry, and to the art form that is the result of it.

As a medium, film is not limited to motion pictures, since the technology developed as the basis for photography. It can be used to present a progressive sequence of still images in the form of a slideshow. Film has also been incorporated into multimedia presentations and often has importance as primary historical documentation. However, historic films have problems in terms of preservation and storage, and the motion picture industry is exploring many alternatives. Most films on cellulose nitrate base have been copied onto modern safety films. Some studios save color films through the use of separation masters: three B&W negatives each exposed through red, green, or blue filters essentially a reverse of the Technicolor process. Digital methods have also been used to restore films, although their continued obsolescence cycle makes them as of 2006 a poor choice for long-term preservation. Film preservation of decaying film stock is a matter of concern to both film historians and archivists and to companies interested in preserving their existing products in order to make them available to future generations and thereby increase revenue. Preservation is generally a higher concern for nitrate and single-strip color films, due to their high decay rates black-and-white films on safety bases and color films preserved on Technicolor imbibition prints tend to keep up much better, assuming proper handling and storage.

In a strategy called virtual cinema, some film distributors have created new partnerships

with small movie theaters and art houses to provide a portion of online streaming sales, including Kino Lorber, Film Movement, Music Box Films, Hope Runs High, and Oscilloscope Labs.<sup>67154</sup> Warner Bros. Pictures announced in December 2020 that it would simultaneously release its slate of 2021 films both as theatrical releases and available for streaming on HBO Max for a period of one month.<sup>155</sup> This approach, called Project Popcorn, led to many filmmakers, production companies and theater chains to voice their disappointment and displeasure over the move, especially since they were not informed and consulted with over the move, as well as in regards to contractual and legal obligations.<sup>156</sup> In March 2021, it was announced that Warner Bros. would discontinue same-day releases in 2022, as part of an agreement the studio reached with Cineworld which operates Regal Cinemas, and would instead use a 45-day exclusive release window for theaters.<sup>157</sup> The studio made a similar deal with AMC Theaters in August 2021.<sup>158159</sup> Paramount Pictures announced that it would release PAW Patrol: The movie on Paramount+ on the same day as its theatrical release.<sup>160</sup>
